## Experienced Professional

Software engineers focus on applying the principles of engineering to software development. Their role includes analyzing and modifying existing software as well as designing, constructing and testing end-user applications that meet user needs — all through software programming languages. The role also focuses on the complex and large software systems that make up the core systems for an organization. There are many roles under the umbrella of software engineering, but the two main ones are Applications Software Developer and Systems Software Developer. Software engineers also tend to specialize in specific areas including databases, cloud, or operating systems such as iOS and Android.

## Personal Details

Father Name :

Quaid-e-Azam

Date of Birth :

12, December 2000

Gender :

Female

Marital Status :

Single

Notional ID :

3459-78646497861

## WORK EXPERIENCE

### Web Developer

Droidor

Apr, 2022 - Sep, 2022

Sour el Ghazlane

*What Is a Project Description? A project description is a high-level overview of why you're doing a project. The document explains a project's objectives and its essential qualities. Think of it as the elevator pitch that focuses on what and why without delving into how*

## EDUCATION

### Masters - Masters in Arts

Punjab University

2012

Sour el Ghazlane

## PROJECTS

### Website Development
